

Extend the life of older CAT generators with a DynaGen RetroKit control panel

“ We removed all the outdated controls and replaced them with the DYNAGEN Tough Series.

I'm very happy with the results. ”
Thanks!

ERIC RISSE

CLEVELAND BROTHERS CATERPILLAR DEALER

Avoid Overpriced Factory Control Panels

The cost of replacing a factory control panel may be too much for some customers, especially if the generator is out-of-warranty. The RetroKit can be installed on virtually any generator and at a fraction of the cost, making it perfect for customers that want to upgrade an older generator.

SAVE TIME WITH ONE COMPLETE PACKAGE!

There won't be any need to contact different suppliers for extra parts, with everything you need shipped in the RetroKit package.

SAVE MONEY FOR YOUR CUSTOMERS

The RetroKit installation will allow your company up to 12 hours of additional installation revenue, while saving your customers thousands of dollars compared to an OEM panel replacement.

ALL THE FUNCTIONALITY YOU NEED

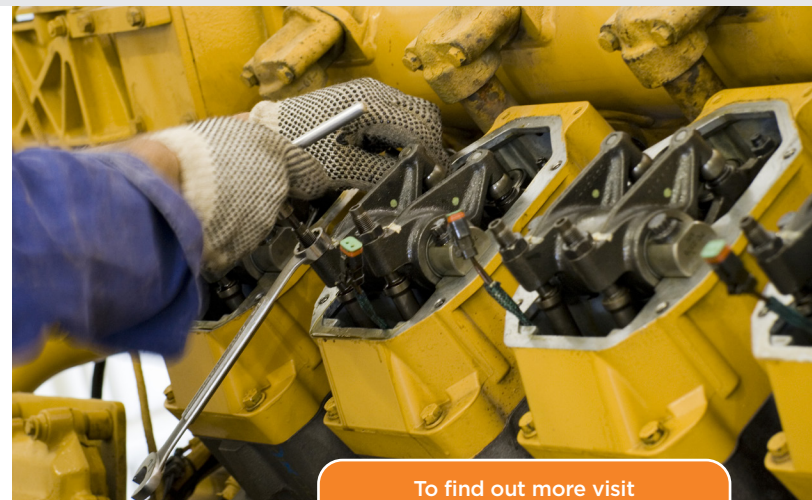

The RetroKit will control everything you need on virtually any installation. Many customers will find more features than before, adding resale value to their older generator.

PROVEN RELIABILITY

DynaGen controllers are proven in the field, and backed with an industry-leading 5 year warranty. This controller will give your customers years of additional service from their machine.

“ We are very pleased with our decision to use the DynaGen RetroKit. They have an excellent product and the customer support is outstanding. Our customers looking to upgrade their older generators get an easy-to-use, reliable product at a cost that made it possible to upgrade their current system for many more years of service. ”

MARK HUDDLESTON

QTY	DESCRIPTION	PART #
1x	TG410 Controller Displays Volts, Amps, Frequency, Oil Pressure, Engine Temperature, RPM, Battery Volts, Hourmeter	TG410-MP-CAN-MBI-G
1x	TG410 RelayPak with three pre-installed 12V 40A cube relays (24V must be ordered separately if required)	RP100-VM
1x	4' Main I/O Engine Wiring Harness 3 Switched Inputs, 3 Switched Outputs, 3 Sensor Inputs, Power	DWG1475
1x	4' TG 3Ph AC Volts Harness	DWG1479
1x	4' TG 3Ph AC Current Harness	DWG1518
1x	4' Advanced I/O Harness	DWG1477
1x	4' Mag Pickup/CANbus/Mobus Harness	DWG1522
1x	NEMA 1 w/ Vibration Mounts 11-3/8" W x 7-3/4" D x 8-1/4" H	ENC0084
1x	Stewart & Warner Oil Pressure Sender 100 PSI 1/8 or 3/8"	ACC0108
1x	Datcon Temperature Sender 280F 1/8"-27 NPTF Temp Sender	ACC0027**
3x	100A:5A Current Transformers	ACC0045
	200A:5A Current Transformers	ACC0046
	300A:5A Current Transformers	ACC0047
	500A:5A Current Transformers	ACC0048
	600A:5A Current Transformers	ACC0049

SELECT ONE

* Single phase kits include Qty 2 Current Transformers. Select CT size according to maximum generator capacity. For CTs greater than 600A please contact us for part numbers and pricing.
 ** Contact us for 3/8" or 1/2" threads PRICES IN USD

RA400 REMOTE ANNUNCIATOR

FOR NFPA 110 APPLICATIONS

The RA400 remote serial annunciator monitors the condition of the generator set from a remote location. The RA400 can help bring your location into NFPA 110 compliance.

- Meets NFPA 110, NFPA 99 & CSA 282-00 requirements
- Provides audible and visual alarms
- Simple and inexpensive
- Used in a wide range of applications
- Works with 3-wire Modbus up to 2,800 ft away.

“ We have been very impressed by the DynaGen RetroKit; it's simple to learn and easy to use for our team and customers. Lots of our used generators customers have smaller generators where an OEM panel is simply too big or too expensive to use.

The RetroKit is our go-to product when these kinds of customers want to upgrade. We love the fact that DynaGen controllers are so reliable, and backed by a 5 year warranty. ”
