### Notes:
1. Harnesses are 5 feet in length except for the three DWG1522 RS485 wires which are 6 inches in length.

### Terminal J3-3
Terminal J3-3 is left unpopulated from the factory and can be populated using one of the two individual wires that came with the harness (a short one with two crimps on both sides and a long one with a crimp on one side and a pigtail on the other). If using relay D on the RelayPak insert one end of the short wire into J3-3 and the other end into RelayPak J1-1. If you are not using the relay pack insert the longer wire into J3-3.
